

GREAT WORK DONE!

The largest commercial office project ever done by 'Milan Manek & Associate' on 'Design & Built' basis at Dahej, Gujarat. The design is totally based on contemporary concept which had aesthetically eye solacing designs with timeless creation.

The commercial premise was offered to 'Milan Manek & Associate' on 'Design & built' basis with consistence of time span of 6 months. This dream project was turned into the reality through extensive work done by design & graphics team, engineering & architectural design team, project managers, site in charge, workforce & other associated teams who has worked very hard to meet the timeline given. To achieve any goal, a great vision and support is required - thanks to Supremo & Project head from client side. The most important part which was taken care while designing this premise was comfortable spaces in & around all the work areas with the provision of proper natural lighting resources/natural air flow to meet the energy conservation norms. As it's the belief of 'Milan Manek & Associate' in green offices concept, which is too important in todays era.
