

EXECUTIVE CABINS:

The cabins blends modern styling with futuristic design. The idea was to create a spacious and inviting atmosphere, this has been achieved both through allocating more space and by incorporating architectural feature into these zones. The executive cabin contains all the comforts, awesome finish, safety and functionality along with the eye catching environment.

EXECUTIVE SUITES :

As in shipbuilding industries production runs 24x7 we have designed 5nos of suites to accommodate the senior most management personnel in the top floor of the office building with uber-luxe amenities to accommodate them conferrable after the working hours.

CONFERENCE HALL:

On each floor two conference halls are located and they're designed in such a way that it covers 25 people at a time, along with video conferencing facility. The conference table is providing an elegant as well as the comfortable look to the chairs kept with it. The conference room is designed in such a way that it doesn't allow the external sound to interfere the internal interaction. Also the room is well equipped with amenities like projector screen & projector, lighting, LCD, phone system, webcam, microphones and speakers, wi-fi internet connection.

LIBRARY:

It is ergonomically designed and there were few important ergonomics considerations in library design, on which thorough research is done and then implemented.

- Choice of technology for library operations
- Physical design and layout of floor space and work stations
- Choice of furnishings and equipment
- Methods of handling books and materials
- Systems for coding information about books
- Devices for moving materials
