

OFFICE AREA :

workstation layout, lighting, and task design can affect the productivity of an employee. In this project the working area is designed according to the various considerations including accessibility, ergonomics, and appliances requirements for safety standards. The work area contains 112 work stations on each floor (1st & 3rd) providing total seating capacity of 336 people with 5'-0" wide desk and back storage to each staff. The managers cabins at the exterior periphery partitioned with full height glass at passage side for proper natural lighting. ■
